Aldec

HDL Design Entry & Verification

www.firsteda.com/aldec

Superior solutions for HDL design entry and simulation; **Active-HDL** has been used by over 10,000 engineers worldwide whilst **Riviera-PRO** provides class-leading verification performance & capacity. **ALINT** is a cost-effective flexible design rule checker for validating VHDL and Verilog code. Aldec's range of specialty solutions also cover **DO-254 Compliance** and **Actel RTAX Prototyping**.

Concept Engineering

Design Visualisation & Debugging

www.firsteda.com/concept

Concept Engineering is the leading provider of standalone debugging solutions for RTL-level (**RTLvision**), gate-level (**GateVision**), transistor-level (**SpiceVision**) and mixed-level (**SGvision**).

Pinebush Technologies

HyperPlot® - IC Plotting Solutions

www.firsteda.com/pinebush

HyperPlot is the undisputed standard for plotting in the semiconductor and EDA industries with over 35,000 engineers worldwide relying on its optimised print engine.

Enabling Design™
